

If you're new to subtle field systems, you'll find that the SE-5 1000 delivers sophisticated solutions to your research needs.

It can deliver a perfect interface to IDFs, Subtle Energy and Biofields most often found in Radionic research. Moreover, it is often the system of choice for small business or home users who want a professional instrument that's simple to understand and use.

So what's the catch? How much does this system cost? Well, there's good news ... and more good news!

Many so called Radionic and Subtle Energy systems can cost easily tens of thousands of dollars. Often times these systems are so complex that you need to spend thousands of dollars more for training.

The SE-5 1000 retails for only ["email for current price"](#), complete with enough basic training (both recorded and "live") to put you well on your way to becoming an expert in the field. Advanced training can be purchased in the form of DVD training courses or through seminars, but is not required.

Here are some of the new features of the SE-5 1000:

- High level Scalar circuitry for long distance balancing.
- Back-lit digital display for easy reading
- Automatic Potentizer for quick and easy remedies
- USB interface for PC connectivity
- Infra Red Scanning probe for accurate Scanning
- Audio input for sound broadcast
- Electro-Luminescent output cable for enhanced balancing
